
A busy day at Dr. Ananya's clinic.
Appointments, patient details, follow-ups...
I wish everything were easier to manage!
Our time belongs with patients. Let's make the rest simpler.

The clinic begins its Welbuk onboarding.
WELBUK PRACTICE for the clinic
We can organise our clinic workflow here.
And our team can use tools suited to each staff role.
WELBUK CARE for clinic staff
One team. Better coordination.

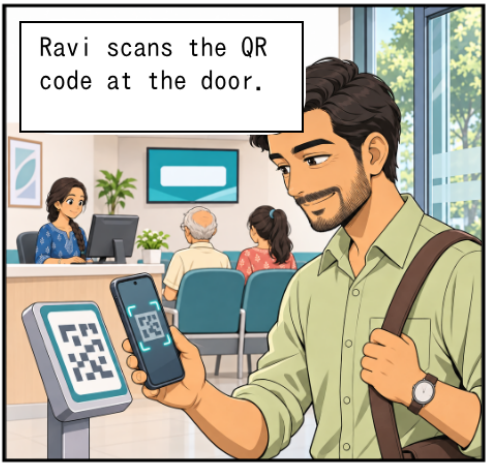

A later morning: patients can always check in at the front desk.

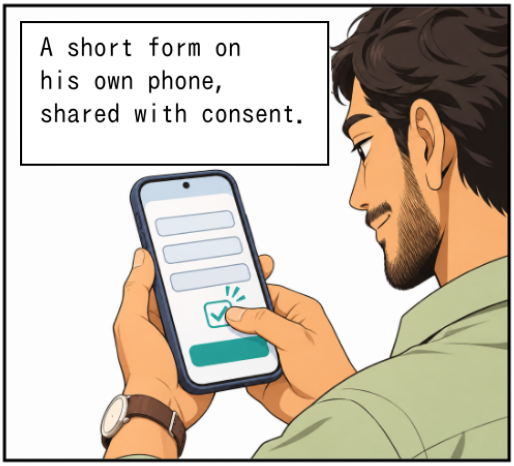

Some check in ahead on the Welbuk Health app.

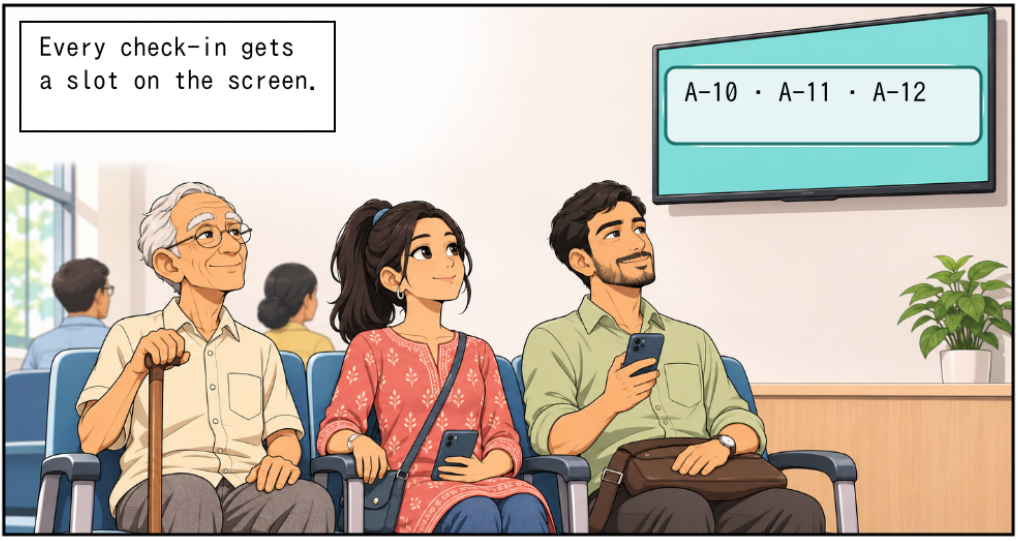

Ravi scans the QR code at the door.

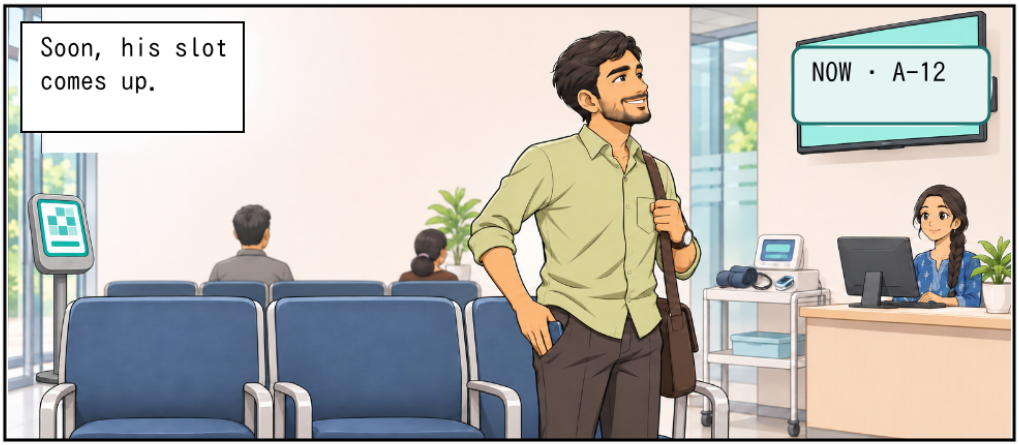

A short form on his own phone, shared with consent.

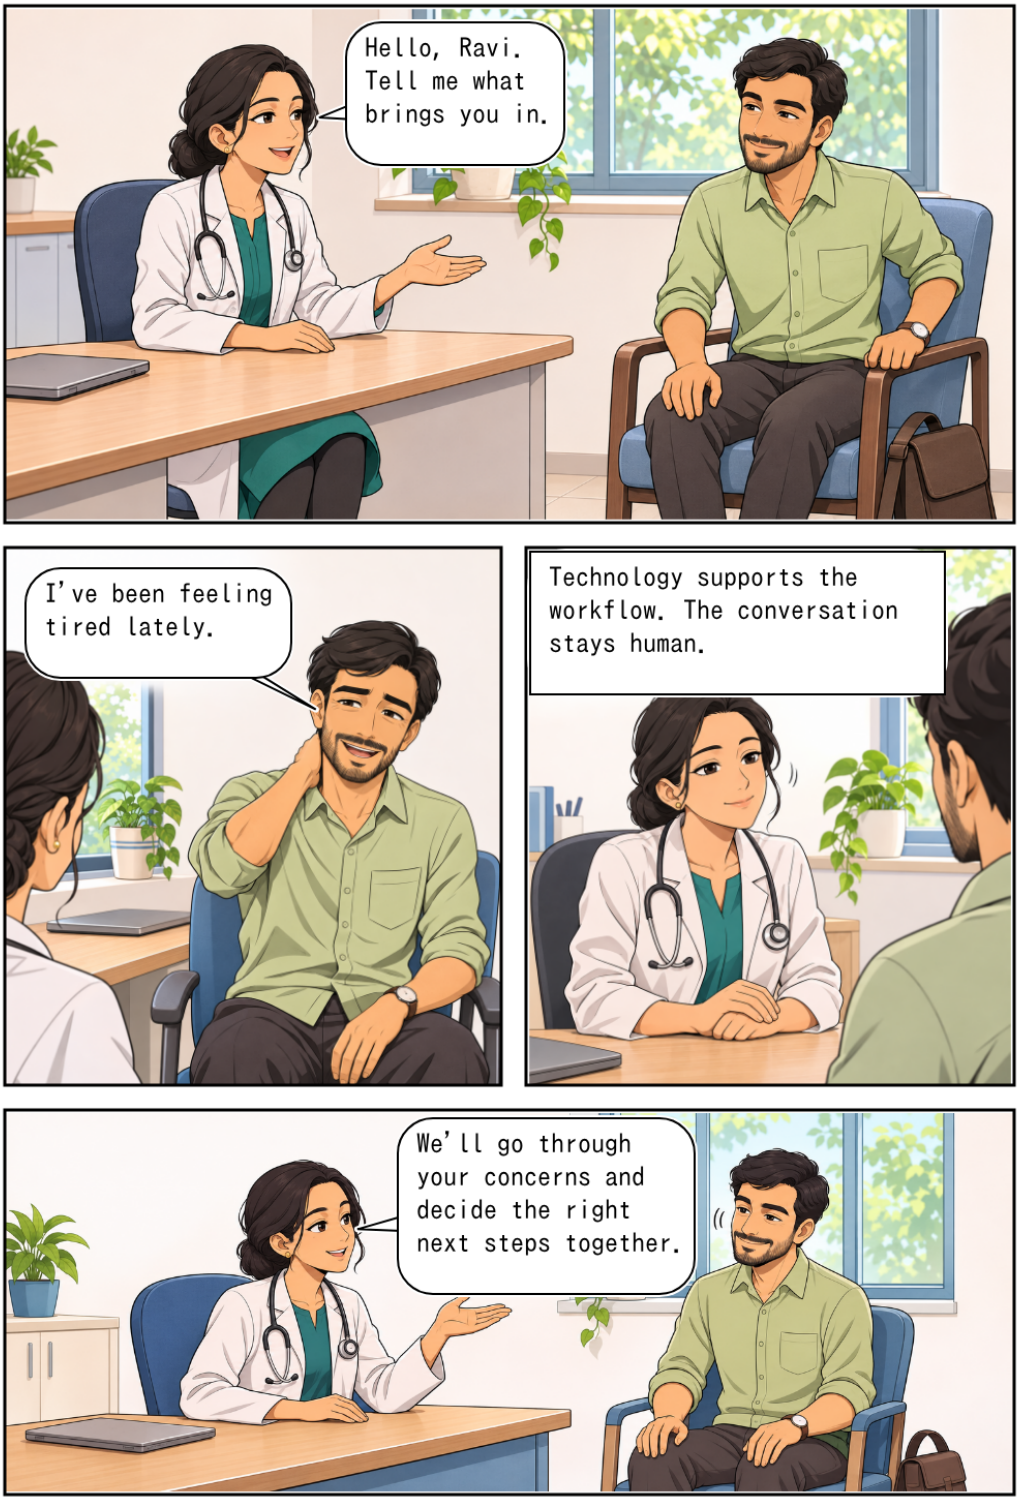

Every check-in gets a slot on the screen.

Soon, his slot comes up.
NOW · A-12

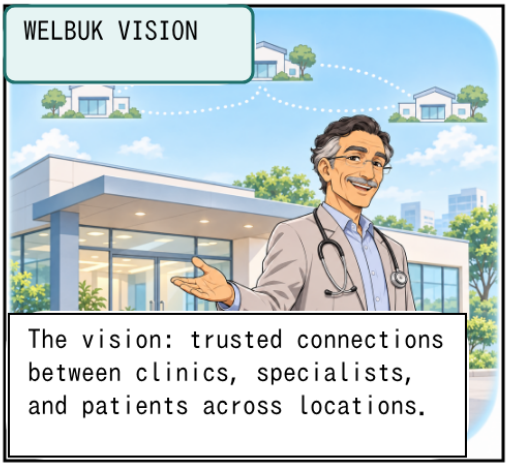

A quick vitals check first.
Hi, Ravi! Just relax your arm for me.

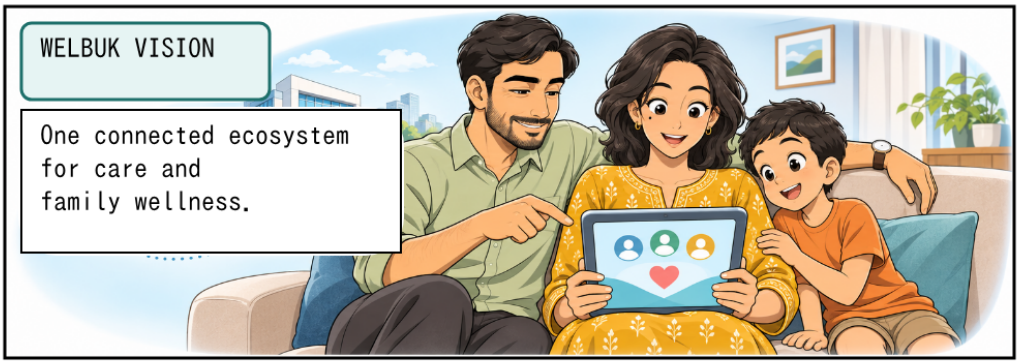

Dr. Ananya is notified when he's ready.
RAVI · READY

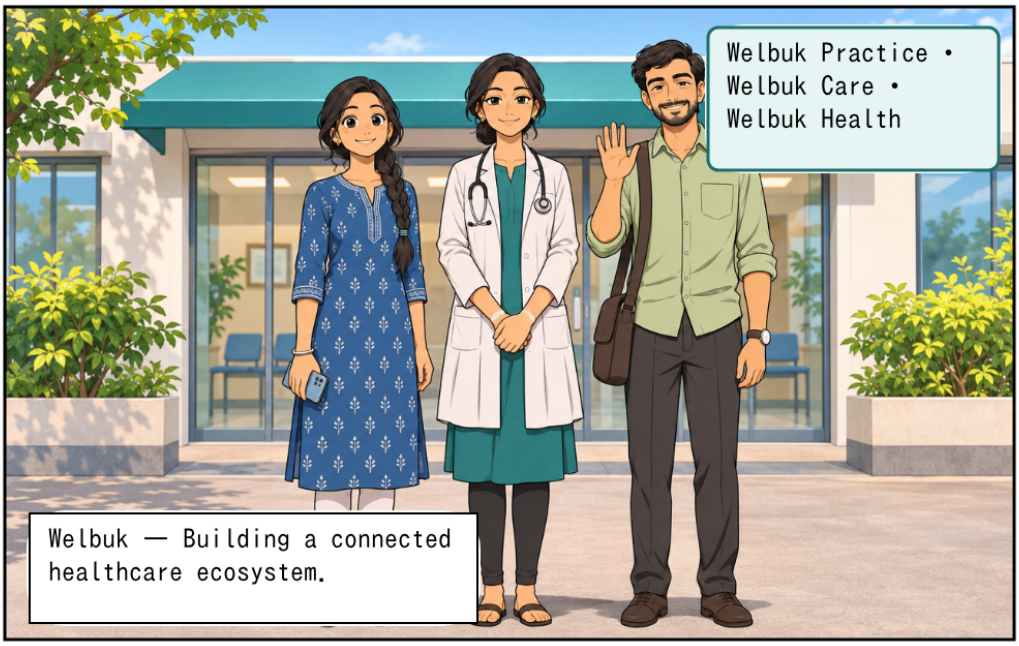

Hello, Ravi. Tell me what brings you in.
I've been feeling tired lately.
Technology supports the workflow. The conversation stays human.
We'll go through your concerns and decide the right next steps together.

Welbuk Health is designed to help patients stay connected with their care.
So I can keep useful information in one place?
WELBUK HEALTH for patients
That's the idea. Let's walk through what is available to you.
A smoother visit. A more connected experience.

Tomorrow, care may take us beyond our hometown.

WELBUK VISION
The vision: trusted connections between clinics, specialists, and patients across locations.

WELBUK VISION
One connected ecosystem for care and family wellness.

Welbuk Practice • Welbuk Care • Welbuk Health
Welbuk — Building a connected healthcare ecosystem.
